

Dispenser for palletstrapping

Dispenser

A dispenser is used for the unwinding of strap (steel and plastic). Besides the strap, a dispenser can also take a strapping tool in the large bucket.

Advantages:

- Rubber wheels (QPW/QPWK have extra large wheels, therefore obstacles can be taken easily).
- Bucket for strapping tools and seals (QPW/QPWK have a large bucket).
- A brake system controls the output of the strap.
- Because of the three-unit (strap, cordless strapping tool and dispenser) everywhere usable.
- The strapping coil is easy to replace.

Technical data:

| Model | Inner core | Outer core | Width | Coil | Strapwidth | Operation area |
|-------|------------------|------------|--------|--------------|------------|-------------------|
| QPWK | 406 mm | 600 mm | 150 mm | NA | 9 - 19 mm | plastic strapping |
| QPWP | 406 mm | 600 mm | 150 mm | NA | 9 - 19 mm | plastic strapping |
| QPWM | 200/ 280/ 406 mm | 600 mm | 150 mm | NA | 9 - 19 mm | plastic strapping |
| QPW | 406 mm | 600 mm | 75 mm | Oscillated | 10 - 19 mm | steel strapping |
| QPF | | 655 mm | | Ribbon wound | 10 - 32 mm | steel strapping |
| QPL | | 620 mm | | Ribbon wound | 10 - 32 mm | steel strapping |
| BJ 31 | 400 mm | 600 mm | 75 mm | Oscillated | 10 - 19 mm | steel strapping |
